SUMMARY

Software Engineer and Full Stack Developer with hands-on experience building scalable web applications using React.js, Django, REST APIs, and MySQL. Strong foundation in software development principles, database optimization, API integrations, and responsive UI design. Familiar with Agile methodologies, SDLC, Git workflows, and cloud fundamentals including AWS. Passionate about problem-solving, clean architecture, performance optimization, and learning modern technologies including microservices, Docker, and CI/CD practices.

EXPERIENCE

Full Stack Python Intern, Cybrom Technologies

Mar 2026–May 2026

- Engineered a full-stack Airbnb Clone serving multi-user workflows using React.js, Django, and MySQL
- Designed and integrated REST APIs using DRF, improving backend efficiency and data handling
- Optimized frontend performance and UI rendering, reducing load time by ~25%
- Implemented multi-tenancy architecture supporting scalable user and property management
- Authored API documentation with Swagger, improving developer onboarding and collaboration

EDUCATION

Lakshmi Narain College of Technology, Bhopal

2021–2025

B.Tech in Computer Science Engineering

CGPA: 7.01

Relevant Coursework: Data Structures, DBMS, Operating Systems, Computer Networks

Delhi Public School, Satna

2018–2021

CBSE Class XII: 65% | CBSE Class X: 65%

SKILLS

Programming Languages: Python, JavaScript (ES6+), TypeScript (Basic), C++, C, SQL

Frontend Development: React.js, HTML5, CSS3, Tailwind CSS, Responsive UI Design, Single Page Applications (SPA)

Backend Development: Django, Django REST Framework, REST APIs, JWT Authentication, Microservices Fundamentals

Databases: MySQL, SQLite, Database Design, Query Optimization, PostgreSQL (Basic), MongoDB (Basic)

Tools & Technologies: Git, GitHub, Postman, Swagger, Jira, Agile, SDLC

Core Competencies: Full-Stack Development, Debugging, UI/UX Design, Performance Optimization

PROJECTS

Credit Management System

React, Django, MySQL

- Built a digital credit tracking system replacing manual bookkeeping, reducing manual effort by 40%
- Implemented role-based authentication ensuring secure and controlled Admin/Employee access
- Designed REST APIs and optimized MySQL schema for efficient transaction handling
- Developed responsive UI enabling faster data entry and improved usability

WorkAtHome Service Platform

React, Django, MySQL

- Developed a centralized service marketplace improving accessibility for multiple home services
- Built role-based dashboards for users and admins, streamlining booking and service management
- Designed scalable backend and API integrations for seamless frontend interaction
- GitHub

Airbnb Clone

React, Django, MySQL

- Built a full-stack property booking platform supporting authentication and booking workflows
- Implemented multi-tenancy architecture enabling scalable and modular system design
- Improved frontend responsiveness and application performance
- GitHub

Portfolio Website

React

- Designed and deployed a responsive personal portfolio showcasing projects and skills
- Optimized performance for fast load time and cross-device compatibility
- Live

CERTIFICATIONS

Python Full Stack Development – Cybrom Technologies | AWS Cloud Foundations

Cisco Virtual Internship (2023, 2024) | Cisco & OpenEDG Python Certification
